

iReminder SB20

Proximity Monitoring System that lets you know where your iOS/Android devices, key and valuables

**Bluetooth 4.0
BLE**

An electronic leash that will sound an alarm when your iOS/Android devices leaves your vicinity. You can also use your iOS/Android devices to find the lost iReminder thanks to the duplex communication protocol. A handy app called iStuffFinder, will show on Apple or Google Map the last time the iReminder and phone were connected. As a remote shutter release for self-portraits or to prevent blur by shaking camera. The app can control the alarm threshold distance, set the iReminder to start beeping when a call is incoming, and switch the proximity alarm on/off. The app use with multiple iReminder units and includes all of the mentioned features. Simple to use interface allows you to re-name each tag attached to your valuables, such as Keys, Wallet, etc. A brilliant little device that could save you a lot of trouble.

Loss Prevention - Warning alarm prevents loss of iOS/Android devices, keys and more....

When you reach 6~50 feet / 2~15 meters from the iOS/Android devices, the iReminder will begin to beep. If you move back into range, the alarm will cease.

Two-Way FindME - iReminder and iOS/Android devices can instantly find each other

You can search for a misplaced iOS/Android devices using the iReminder, but only if the iReminder is within a 164ft/50m radius - conversely, you can also search for your iReminder with your iOS/Android devices.

Notification of incoming calls - on your iOS/Android devices

When someone calls your phone, the iReminder SB20 starts beeping to remind you.

Take a picture easily - Support "Photo capture" remote control

SB20 can trigger your iOS/Android devices's camera function release remotely when it connected. Use SB20 as a remote shutter release for self-portraits or to prevent blur by shaking camera.

Last seen - Shows you a map with a pin that identifies the last place your missing item were located

Automatically set last seen for user when iOS/Android devices and iReminder are out of the "Link Loss" range. If the user does not use the Key Tag "Link Loss" for automatically set functions, you can manually use the App to enable set Map functions for the "PlaceMarkPin" setting. The App will show 'P' message to remind you that smart tag has last seen for you to review.

Supports multiple devices - With free iOS/Android App

App iStuffFinder allows you to add up to 4 iReminder devices, so you can keep track of your most valued items, such as a key, kid, purse or car.
